

Example

Two puncture treatments (A, B) evaluated using pig eyes.

Day 1 :  A  A  A  A  A  A

Day 2 :  B  B  B  B  B  B

⇒ Treatment is confounded with day!

Better: use day as block factor.
(device calibration, personnel, ...)

Day 1 :  A  B  A  B  B  A

Day 2 :  B  A  A  A  B  B
